Thanks Steve. I was hoping that the Navy would be including everything onto the same map, so that we could present just one inclusive map at upcoming briefings. Alternatively, if we have the data electronically in a format compatible with our system, we might be able to produce our own map. I'll discuss this more with Rob.

Carol,

See attached work plans and corresponding figures. Please call if you have any questions.

Thanks,

Steve

Thanks Steve. The table is useful but it doesn't seem to correlate with the map. For instance, I didn't see proposed borings from the table plotted on the map (153, 158, 141, 157, 159, etc.), and vice versa, I didn't see on the table the borings that the map indicated as proposed (145, 146, 147). Do you have a map that is more consistent with the table?

Thanks,
-Carol-

Carol,

Attached please find the Naval Facilities Engineering Command (NAVFAC) contractor's drilling schedule, updated in 11-2014, that you have requested. I have also attached an appropriate site figure to assist you in establishing their locations. Please call direct should you require further information.

Thanks,

Steve

Hi Steve - Do you have a recent schedule from the Navy showing when they anticipate installing the next VPBs and monitoring wells, especially those in the vicinity of BWD #6?

Thanks,
-Carol-
